## MISSIONARY WILL SHOW FILMS

According to Rev. Victor Leng, religious freedom in recent years has been denied many of the people of the land of Columbia, South America and a large number of protestants and evangelists have lost their lives because of religious persecution in that land.

Rev. Leng, missionary for two terms to Columbia, will show pictures and tell of the work of the EUSA in Columbia at a meeting to be held in the Evangelical Free Church on Tuesday, November 20th at 8:00 P.M. All are invited to attend.

## RED CROSS RELIEF FLOWN TO HUNGARY

A cargo of drugs and medical supplies weighing 11,000 lbs and valued at \$40,000 is enroute to victims of Hungarian disturbances. The shipment was loaded aboard a North Star aircraft of the R.C.A.F. Air Transport Command at Malton Airport on Tuesday afternoon and is scheduled to reach its destination sometime on Thursday.

The drugs and medical supplies are being sent from the Canadian Red Cross to the League of Red Cross Societies in care of the Austrian Red Cross in Vienna. The plane will be met by a representative of the Canadian Legation and the relief supplies turned over to the Hungarian Red Cross for distribution to victims in areas affected by the conflict.

The Canadian Red Cross shipment consisted of sulpha drugs, penicillin, streptomycin, sterile field dressings, bandages, splints, hospital sheets and pillow cases. Richard H. Gluns, National Director of Public Relations for the Canadian Red Cross accompanied the shipment.

## NEW AUTO COURT PLANNED FOR BASSANO

At the recent meeting of the Town Council an application by C.H. Goring to purchase 10 lots near the Trans Canada Highway was approved as was an application for a building permit to erect buildings and improvements valued at \$25,000 for use as an auto court and trailer camp.

Bassano should be an ideal location for an auto court and a trailer camp. It is one of the few towns where the highway adjoins the town and is approximately mid-way between Medicine Hat and Calgary.

Mr. Goring plans to start construction at once and expects to have some of the buildings completed before Christmas. He will operate the auto court in conjunction with his present business, Casey's Texaco Service Station.

## ART EXHIBITION AT BASSANO

The Imperial Oil Ltd. collection of sketches by that outstanding painter, C.W. Jeffreys, will be shown to the public at the Red Cross Rooms on Thursday, Friday and Saturday of this week.

This exhibition will consist of forty pen and ink drawings and demonstrates the skill of artist Jeffreys as an illustrator of historical events of the Canadian west. Every Canadian school child is familiar with the Jeffreys illustrations which have always been freely used in school text books and it is largely for his drawings that he built up such a solid reputation.

This exhibition comes to Bassano on the Western Canada Art Circuit winter tour and should prove very interesting to all lovers of art. This art collection is exhibited through the courtesy of Imperial Oil Limited.

## OUR CHURCHES

### KNOX PRESBYTERIAN CHURCH

Sunday School - 10:00 A.M.  
Morning Service 11:00 A.M.

Minister - Rev. Doran.

\*\*\*\*\*

### BASSANO EVANGELICAL FREE CHURCH

Sunday School - 10:30 A.M.  
Evening Prayor - 7:30 P.M.

Pastor - Rev. Leon A. Tiede.

\*\*\*\*\*

### ST. MARY'S ANGLICAN CHURCH

Sunday School - 2:00 P.M.  
Evensong - 3:00 P.M.

Rector - Rev. G.B. Hotchkiss.

## TOWN TOPICS

Members of the Bassano 4H Club motored to Taber on Friday where they toured the sugar factory. Mrs. Grant Bodmer furnished the transportation and acted as chauffeur.

\*\*\*\*\*  
Mr. and Mrs. Hugh Pearce motored to Calgary on Monday to visit Hugh's parents and brother.

\*\*\*\*\*  
The Imperial Hotel has erected three new signs and has the appearance of being lit up like a Christmas tree at night. The signs have definitely improved the appearance of the hotel.

\*\*\*\*\*  
In the September supplement of the catalog of the National Library of Canada at Ottawa we note that it mentions that Vol. 1, No. 1 of the Bassano Herald is on file in the library.

\*\*\*\*\*  
Miss Betty Ann Jorgenson wishes to thank all those who sent her gifts and best wishes for her future work.

\*\*\*\*\*  
Miss Jorgensen is now enroute to India where she will be a missionary and nurse in one of India's leper colonies.

\*\*\*\*\*  
A Calgary man's auto was badly damaged when it collided with a "cattleliner" truck at the entrance to Bud's Service Station on Monday.

\*\*\*\*\*  
The truck was loaded with cattle and, as it escaped without damage, was able to proceed to Calgary after a short delay.

\*\*\*\*\*  
Gosh! The way the Brooks citizens are talking, I don't think I will go hunting antelope around there without a R.C.M.P. body guard.

\*\*\*\*\*  
A meeting to organize a Handicraft Centre will be held in the Bassano School on Thursday, November 22nd at 8:00 P.M. Miss Archibald from the Cultural Activities Branch of the Alberta Government is expected to attend.

\*\*\*\*\*  
Don't forget the meeting of the Bassano Home and School Association to be held in the Bassano School on Monday, November 19 at 8 P.M.

\*\*\*\*\*  
The Anglican Ladies Guild plan to hold a Bazaar and Tea in the Armouries on Wednesday, November 28th from 3:00 to 6:00 P.M.

\*\*\*\*\*  
And then there was the fellow that started from Vulcan for Strathmore and ended up at High River. Hmmmmmmmm.

## Are the farmers happy?

(From The Swift Current Sun, Swift Current, Sask.—Aug. 29, 1956)

We were interested in a front page story in the North Battleford News-Optimist last week, headed "Are Farmers Happy?" It was a report on a meeting held in the Oddfellows Hall in that city which was addressed by Jack Schultz, chairman of the Inter-Provincial Farm Union Council. Pointing to the empty seats in the hall, Mr. Schultz was reported as saying, "I have come to the conclusion that farmers in Saskatchewan are more satisfied with present conditions than in other provinces... Not only have they brought the Saskatchewan Farmers' Union almost to a standstill, but they do not even come to the meetings."

He could not understand how this could happen in the province "which suffers most". Mr. Schultz pointed out that there were only two years, actually, in our history, 1931-32, when the buying power of a bushel of wheat was lower than today, and that "as far as our cattle prices are concerned we have practically reached the same miserable position." Mr. Schultz said he had heard, since coming to the province from his Manitoba, that farmers do not come to the Farm Union meetings because the Unions are not doing anything. He challenged this statement, and said that farmers could not know what the Unions are doing if they did not attend meetings.

It all depends, perhaps, on how one views things. The C.C.F. propagandists would say that the farmers are a most satisfied bunch in Saskatchewan because of the good provincial administration they get. The Liberal bigwigs at Ottawa say the farmers of Saskatchewan should be satisfied; they have enjoyed good crops, got a fair price for their products. There is, in truth, an atmosphere of reasonable prosperity in Saskatchewan today, taking a broad view of the whole economic structure. We've heard little beefing by cattlemen about their prices lately, and if they are upset, or if the farmers are upset, the upsetting isn't too visible. Maybe because they are so danged busy harvesting a good crop and worrying where they are going to store the stuff. Certainly there is no group in our economic setup today that could be described as "satisfied". Even the millionaire seems to want to keep on making millions even though he wouldn't know how to spend it all if he tried. In 1932 or 1937 Mr. Schultz would undoubtedly have pulled hundreds and hundreds into the Oddfellows Hall at North Battleford. In 1956, well, the belly is fuller and outlook brighter.

## We're grateful to our town

(From The Clarion, Kindersley, Sask.—October 4, 1956)

In the painful weeks since the onset of the editor's last illness, we have learned much about the meaning of life in a small town. It has been a comforting and an inspiring experience to feel a whole community rallying round with help and encouragement and sympathy. We have learned the miracle of courage and strength renewed by a friendly handclasp, offered in silence but more eloquent than any oratory in its message of sympathy and reassurance.

The painful memories of these tormented days are brightened by a hundred faces, in pleasant focus against a hazy background of Main Street—faces of folk who stopped in the midst of their daily round to ask about the progress of their editor, to assure us that their hopes and prayers were with him or to explain (after the sad news of his passing was known) how deeply they shared in our loss.

We of his immediate family find words most inadequate to express our gratitude for the hundreds of little acts of kindness and expressions of friendship which have been showered upon us by the people of "our town".

### CLIMBING LIZARDS

The gecko, a small lizard, has minute hooks in its feet which enable it to climb even a pane of glass. 3219

## If You're TIRED ALL THE TIME

Everybody gets a bit run-down now and then, tired-out, heavy-headed, and maybe bothered by backaches. Perhaps nothing seriously wrong, just a temporary toxic condition caused by excess acids and wastes. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys, and so help restore their normal action of removing excess acids and wastes. Then you feel better, sleep better, work better. Get Dodd's Kidney Pills now. Look for the blue box with the red band at all druggists. You can depend on Dodd's. 32

## FINAL POLIO SHOTS SET FOR 200,000

Enough Salk anti-polio vaccine to complete the vaccinations of 200,000 Manitoba school children and five-year-olds will be in provincial hands by the end of next January, Hon. W. Bend, Health Minister, announced recently.

He said he had received assurance from Ottawa that the final shipments of all vaccine ordered by Manitoba would start coming in Oct. 31 at the rate of 15,000 doses a week. The order will be completed with the last weekly shipment at the end of January.

When the last shot of this shipment is administered, it will mean, said Mr. Bend, that all children in the province from age five to the end of Grade nine will have received their third and final vaccinations.

The shipments coming in not only will be sufficient to give all these children their total required shots, but there will be enough to ensure that every five-year-old in the province gets his full three vaccinations.

The north magnetic pole is in Canada.

UP IN THE WORLD—Keeping in fit trim, Petra Schurman, 23, leaps over a park bench in London, England. The energetic beauty, representing Germany, has been named Miss World of 1956.

There is one corner in the U.S. which is common to four of its states—New Mexico, Arizona, Colorado and Utah, which meet there.

## Many uses seen for A-radiation

Atomic radiation facilities for research and development will be available to individual companies in Canada early next year, says Rodney Touche in The Financial Post. The first commercial irradiation plant in Canada will be powered by a 15,600-curie cobalt source, one of the largest gamma radiation sources in the world. It is to be built and serviced by Isotope Products Ltd., Oakville, Ont.

Specific applications of gamma radiation include:

Preservation of food and beverages, pasteurization of milk, meat and beer, curing tobacco, sterilization of canned goods, protection of stored potatoes against sprouting, treatment of grains and flour to kill insects and improve transit in tropical climates.

Sterilizing pharmaceuticals.

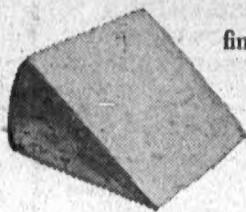

Disposal of sewage.

Improving the insulating properties of plastics and raising their melting point. Adding to the life of nylon bearings. Preventing plastic flooring being marked by furniture.

## You'll find my CHERRY DUMPLINGS easy to make!

Turn out into broad saucepan or electric frypan  
1 can (approx. 15 ounces)  
cherries and syrup  
Add and stir until sugar is dissolved  
1/2 cup granulated sugar  
1/2 cup water  
Cover and bring just to boiling point.

Meantime, sift together into a bowl  
1/4 cups once-sifted pastry flour  
or 1/2 cups once-sifted all-purpose flour  
2 1/2 teaspoons Magic Baking Powder  
1/2 teaspoon salt  
2 tablespoons granulated sugar  
Cut in finely  
2 tablespoons chilled shortening  
Mix in  
1/2 teaspoon grated orange rind

Make a well in dry ingredients and add  
1/2 cup milk  
and mix lightly with a fork, adding more milk, if necessary, to make a drop dough. Drop by large spoonfuls over cherries. Cover and simmer 15 minutes, without lifting lid. Serve immediately. Yield: 4 or 5 servings.

Guard against failures... use dependable MAGIC Baking Powder. MAGIC protects all your ingredients, gives you light, tender baked goods. Buy MAGIC today!

## Check your kick with chalk

Kicking is a fundamental foot-ball skill, especially in Canada, and a good kicker can usually be sure of a spot on the team. But to be considered a good kicker, you have to be able to get away those high spirals, and this means perfect timing.

One of the things that gives you a good spiral is the way your foot contacts the ball. Your toe should be pointed just slightly inward and the seam of the ball should be just across the instep with the point just slightly to the left of the toe.

A good way to check your foot contact with the ball is to mark the underseam with chalk. When you kick a mark will be left on your boot. In this way, you can check just how your foot is meeting the ball, and correct any faults in position you notice from the chalk mark.

### Preventing "hockey groin"

One area in which hockey players frequently suffer injuries is the groin. A few years ago, a serious groin injury almost ended the career of Maurice Richard, and it's rarely that a team goes through an entire season without at least one or two of the players suffering this type of injury.

Now is the time to start building up the groin and the area along the top of the inside of the legs. Added strength here will not only prevent injury but also will aid your speed and agility.

The exercise we recommend is "bag squeezing". Sit down and hold a large sawdust bag or pillow between your knees. With inward pressure of the legs try to squeeze it flat. Hold this pressure for five or six seconds, relax and then repeat. Do this 10 or 12 times.

Start now and build yourself up for the coming season. It's the smartest play you can make.

### Back up your blocker

If you're a football halfback, remember that your long runs are usually made possible by good blocking. Make sure you give your blockers the credit they deserve.

You can boost the morale of your blockers and inspire them to greater efforts if you tell them right after every good play what a great job they did and how much you depend on them. Don't wait until the end of the game—if you can inspire them to greater efforts while the action is going on, they'll do an even better job and this will mean longer runs for you.

And don't forget, too, to give plenty of credit to your blockers when you're talking football around the school or to any newspapermen. The happier you can keep them, the better the whole team will perform.

## Quick Canadian Quiz

- How did the St. Lawrence River gain its name?
- What Canadian town was almost completely buried by a rock slide?
- In 1945 the federal civil service employed 138,702 persons. What is the present total?
- Income taxes were first collected in Canada in what year?
- Among the world's nations, where does Canada rank as an importer of foreign goods?

### ANSWERS TO QUICK QUIZ

- In total imports Canada ranks third to the U.S. and U.K.; in imports of wholly manufactured goods Canada ranks first. 3. In 1955 federal government employees totalled 181,913. 1. On the day of the festival of Saint Lawrence explorer Jacques Cartier found shelter from a storm in the river's gulf, gave the saint's name to the river. 4. In 1919 as a war tax measure. 2. The town of Frank, Alberta, in the Rocky Mountains.

## GEMS OF THOUGHT

### GRUMBLING

Grumblers are commonly an idle set. Having no disposition to work themselves, they spend their time in whining and complaining both about their own affairs and those of their neighbors. —M. Henry.

Every one may see daily instances of people who complain from the mere habit of complaining. —Richard Graves.

Just as you are pleased at finding faults, you are displeased at finding perfection. —Johann Kaspar Lavater.

Let thy discontents be thy securities. —Benjamin Franklin.

Had we not faults of our own, we should take less pleasure in complaining of others. —Francis de S. Fenelon.

## Ticklers

"Why, you're little Ronnie Slothammer, who always carried a slingshot to school!"

## By George

### HEADS DOWN

When bats sleep or rest, they hang head downward, holding to their perch by means of the claws of their hind feet.

Ordinary goldfish live about 50 years while fancy ones, like the fringe-tail, about seven years.

### SALT USED IN PULP AND PAPER MILLS

Canada's pulp and paper mills used 99,524,000 pounds of salt valued at \$598,029 in 1954.

The first 500-mile Indianapolis speedway race was held in 1911.

# OUR HOSPITAL

BY S.H. EDWARDS

Those people who have been patients in our hospital during the last two weeks quite understand that our need for a new and larger hospital is a real one. During that period we have experienced occasions when every bed and crib in the hospital has been occupied. It is not good to have 100% occupancy. No one can tell when an accident is going to occur and possibly require three or four beds to accomodate the victims. We definitely require more beds and we require facilities, both in the building and the equipment, for the proper care of the patients who will occupy those beds. We need doorways and hallways wide enough to allow the movement of a patient from one room to another without having to take them from their bed. We need a modern radiology suite for the proper treatment of the various diagnostic procedures done by X-Ray. All of these (and others) we do not have at the present time but they are all provided for in the plans for the new hospital which the hospital district proposes to build. There will be a solarium located on the west end of the south wing, quite handy to the patients' rooms, a nice large room glassed in, with easy chairs and couches, where the convalescent patients will find it a pleasure to take the sun and visit with friends and relatives. There will be plenty of bath room and toilet room convenient to the patients' rooms. The pantry or serving room is conveniently located quite close to the patients' rooms so that the meals will be served fresh and hot from the kitchen. Most of the rooms are two-bed rooms with a dividing curtain between the beds for occasional privacy and there are four self contained private rooms.

Mr. C.L. Norton of Rosemary has been appointed Returning Officer to conduct the vote of the ratepayers. He is now busily engaged in surveying the hospital district from Milo to north of Gem and appointing deputy returning officers. The actual vote will be taken on Saturday, December 15th, and legal notices will be posted in all public places by the returning officer before the date of the vote. Plenty of polling places will be arranged for so that no one will have to travel very far to cast their vote. This is a company project and we are the shareholders in the company. We are all financially interested in the prosperity of the property of the company. We all have a free voice in saying whether this company shall advance with the times and prosper or whether it shall lag behind and deteriorate. BE SURE TO CAST YOUR VOTE ON DECEMBER 15th!

## Stubble-burning practice harmful

The practice of burning stubble in the fall, still followed by quite a number of Saskatchewan farmers even today, is of doubtful value and is harmful to the farming business over a long period of time. This statement was made recently by W. E. Johnson, soil conservationist with the Saskatchewan Department of Agriculture.

"When asked why they burn their stubble, most farmers will say they do it to control wild oats and other weeds. Some say they do it in order to get rid of excess straw, which they claim hinders tillage operations."

"Careful observation over a long period of time has shown that wild oat infestation was affected little by burning the stubble. Other weeds did not seem to be controlled to any extent either by the burning practice, though at certain times this appeared to be the case."

"At times the depression in nitrogen supply on a stubble crop is reduced through destroying the straw on a field, but this advantage is far outweighed by the fact that in the process erosion is made easier. We have to overlook that small immediate gain in favor of maintaining the soil's productivity for the future."

"Stubble residue plays a very important part in the prevention of wind erosion and maintains humus and fibre for soil fertility. When the stubble is destroyed so is the binding material which gives the soil its structure and ability to take in large quantities of water necessary for the growth of crops."

"There are few farms in the province where excess straw has proven any real tillage problem. With the introduction of newer implements with greater trash clearance this problem diminished."

"The mineral constituents of a soil are essential to the growth of good crops. However, we cannot overlook the fact that without humus added to these minerals the soil could take in little water and would be very subject to severe erosion."

## Funny and Otherwise

It is pretty hard for a woman to buy shoes that fit the occasion and also her feet.

The soldier had been out on a spree, and to finish with, he hired a taxi. Unfortunately, when the taxi came to a stop, he found that he hadn't a cent left and he explained to the driver: "That's the position, old man, and you can't get blood out of a stone."

"No," agreed the 6-ft. 4-in. taxi driver, rolling up his sleeves ominously, "but what makes you think you're a stone?"

The head of a Wall Street brokerage firm observed, "When I stroll through the typing department, it's like a piece of uranium approaching a battery of Geiger counters. The closer I get to those girls, the faster they click!"

An eccentric member of a country club in Iowa often comes to dinner with a yacht captain's hat on his head, though the only body of water within a radius of a hundred miles is the bird bath in the town plaza. "I come from a seafaring family," he explains. "My father was hailed as 'The Old Skipper'. That's right," agrees his long-suffering wife grimly, "particularly by landlords and the finance company."

New definition of a typical father: A man whose daughter marries a man vastly her inferior mentally but then gives birth to unbelievably brilliant grandchildren.

Think twice before you say nothing.

## Mt. Everest's conqueror prepares for an even greater adventure

By ARTHUR SCHOLES  
(CPC Correspondent)

Sir Edmund Hillary, conqueror of Mt. Everest, is about to enter on an even bigger adventure. He will leave Dunedin on the south island on his way to the Antarctic.

Sir Edmund will head a 25-man New Zealand scientific team which will participate in International Geophysical Year assignments, and also in the attempt of the British Commonwealth expedition to cross Antarctica for the first time.

Three New Zealand observers accompanied the U.S. Deepfreeze expedition to the Antarctic in December last year. They selected a site for the New Zealand base camp in McMurdo sound in the Ross sea.

The New Zealanders have called their camp, Scott Base, in honor of the famed British explorer, Capt. Robert Scott, who perished on his way back from the South Pole in 1912.

The Commonwealth Transantarctic expedition will attempt the crossing from the Weddell sea, 2,000 miles to the Ross sea, during the Antarctic summer of 1957-1958 (November to March).

The advance party from London established a base on the icy coastline of the Weddell sea in January, this year. The camp there is called Shackleton Base in memory of Sir Ernest Shackleton, who attempted the first crossing of the Antarctic continent in 1915-1916.

Sir Ernest Shackleton's ship, Endurance, was crushed in the ice, and after 18 months of hair-raising adventure, the survivors managed to reach the safety of South Georgia Island.

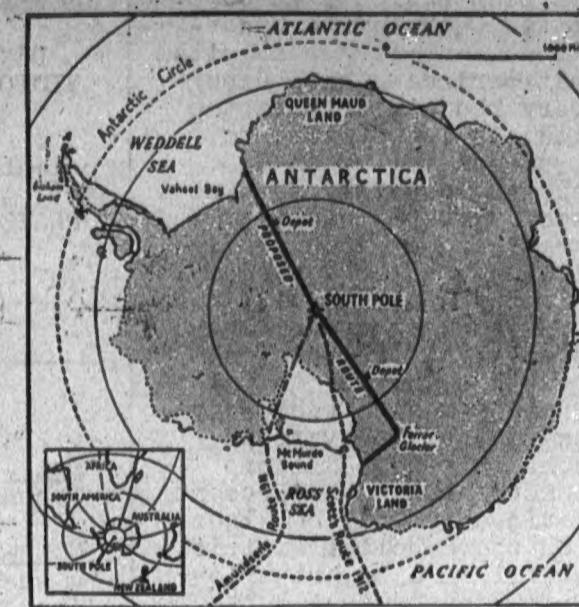

The Commonwealth expedition under the leadership of Sir Vivian Fuchs will leave Shackleton Base

SIR EDMUND HILLARY

in December, 1957, to attempt the crossing.

The expedition will be met on the polar plateau by Sir Edmund and his team of New Zealanders, who will have prepared depots and supply dumps for the remainder of

Route of Antarctic Crossing by Commonwealth

the route to Scott Base on the Ross sea side.

When Sir Edmund sails from New Zealand for the Ross sea at the end of this year, he will be aboard a New Zealand exploration ship also named the Endeavor.

The cost of the Commonwealth

## Colorful home promotes better family life

Color plays an important role in promoting efficiency and a feeling of well-being in the family circle.

The value of interior color was shown recently in a two-year study by John Hopkins University of 2,500 Baltimore school children.

After a year in attractively color-styled classrooms, the pupils boosted their average grade nine percent, and their attendance 13 percent above the previous year spent in drab classrooms.

Homeowners can brighten the lives of their families in much the same way by following these four guides for interior styling:

- Two or three bright colors in one room can make it cheerful and pleasant. But limit bright colors to three.

- Warmly painted windows and panel doors add appeal to the walls of any room. For an especially attractive effect in a large room, ponderosa pine doors and windows can be painted in hues which subtly contrast with the wall color. Small rooms, however, should have doors and windows painted to match the walls. Wood windows are the only type that can be painted or stained for these decorative effects.

- Dark colors make a ceiling seem lower, while light colors give the room height.

- Any room seems to shrink in size the moment dark colors are applied, but light colors make it appear to expand.

Hawaii is sometimes called the "crossroads of the Pacific."

Transantarctic expedition will be about \$1.5 million. The expenses are being borne by the United Kingdom, Australian, New Zealand and South African governments.

The crossing party will have both land and air transport. Four men of the Royal Air Force with two Auster aircraft specially equipped with skis and floats, accompanied the advance party. They will accompany the main party next year.

Four U.S. produced heavy-tracked vehicles, known as "Sno-cats", will be used for the cold continental crossing. United Kingdom war office vehicles, known as "Weasels", are also being taken. A modern type of ice-breaking ship, the Magga Dan, is now being built in Copenhagen, Denmark, and will be chartered by the expedition for two years.

Sir Edmund and his team have just completed rigorous pre-expedition training in the icefields and glaciers of the Southern Alps of New Zealand.

Here, 7,000 feet up, in a world of glaciers, and snow-capped mountains, Sir Edmund 10 years ago learned to climb mountains as tough as any in the world—except the Himalayas.

This time the pre-expedition training, including dog sled journeys, air-supply dropping, navigation, ski-touring and ice craft, will prove invaluable in the Antarctic. The Scott Base is 800 miles—as the skua gull flies—from the South Pole.

Among the party crossing over from the Weddell sea with Fuchs will be New Zealander George Lowe, who accompanied Hillary to within the last few hundred feet of the world's highest mountain. Hillary and Lowe will meet again on the polar plateau, 10,000 feet up, in one of the most dramatic reunions of the scientific age.

Together with the crossing party, they will return along the string of supply depots previously established between Scott Base and the Pole. The New Zealanders will return to their homeland in March, 1958.

## Host of new wood products

The use to which paper has been put in the last few years is staggering. Imagine a romper-type bathing suit or even a strapless evening gown made of paper! Yet it has been done and will, in a few years become quite common. Both of these have been made as soft as our well-known Kleenex, but have been made exceedingly strong by super-wet strength treatment and by reinforcing with a cross-laid nylon or rayon threads. Just think of caps and gowns for graduation which will be cheap enough to be used once and then thrown away.

Snow fences or reinforced kraft paper fastened to metal posts have been used successfully. Paperboard containers and packages that will withstand exceedingly high temperatures, in which frozen foods are sold, cooked and served are now in daily use.

Seat covers, furniture upholstering materials, paper bags (noiseless) for popcorn eaters in theatres as well as non-rattling script paper for use in radio and TV studios are now available.

A new paper towel that also serves as soap and water has already found its place on many airlines. Creped wet-strength paper towelling, saturated with a skin-cleansing lotion is wet until taken out of its aluminum-foil sealed envelope. After use the lotion evaporates in a few seconds leaving the skin cool and dry.

A new self-adhering wallpaper which sticks without wetting or gluing, a wallpaper which incorporates a fly-killing insecticide and a wallpaper which repels dirt are becoming common-place for the home-maker.

A new paper garbage container which can hold up to fifty pounds of wet garbage is now in the market and should prove extremely useful.

## New date will beat heartache

What should a teenage girl do when she falls in love with a boy and he turns her down in favor of another girl? Get madly jealous?

Not at all, says a leading psychiatrist who is an expert on teenage love affairs. The girl should deliberately set about blotting the episode from her mind.

She should at once burn the boy's love letters, all of them, however ardent they are. Then she should calmly destroy all photographs of him and get rid of other souvenirs.

Having done these things she should set about getting as many dates with other boys as possible. She will quickly discover that a new boy friend by her side at least partially banishes ghosts of the past. By repeating the process over successive days, she is helping Father Time to free her from the fetters of her past romance.

Frustrated love can be conquered like any other bad habit, the expert points out. It is utterly folly for a jilted girl to plead with her former sweetheart or make a scene by bursting into tears when she sees him.

A bee travels 43,776 miles to gather a pound of honey, consisting of 29,154 drops.

## Try my wonderful GLAZED PEACH PINWHEEL PUDDING!

Drain and save syrup from 20-ounce can sliced peaches. Sift together once, then into bowl, 2 c. once-sifted pastry flour or 1 1/2 c. once-sifted all-purpose flour. 4 tbsps. Magic Baking Powder. 1/2 tsp. salt. 1/4 c. granulated sugar.

Cut in finely 1/2 c. chilled shortening. Make well in dry ingredients; add 1/2 c. milk and mix lightly with a fork, adding milk, if necessary, to make a stiff dough. Knead 10 seconds on floured board. Roll out to 8 x 12-inches. Spread with 1/4 c. thick raspberry jam.

Sprinkle with 2 tbsps. chopped almonds. Arrange peaches over dough. Beginning at a short edge, roll up; cut into 6 slices. Place, cut side up, in greased 7 x 11-inch pan. Bake in hot oven, 400°, 25 mins. Meanwhile, bring to boil, stirring, 1 tbsp. granulated sugar, 1 tbsp. corn starch, few grains salt, 1 1/2 tbsp. lemon juice, 1 c. peach syrup (use water, if necessary, to bring measure up to 1 c.). Stir in 1 tbsp. butter or margarine and 1/4 tsp. almond extract.

Pour over partially cooked pinwheels. Bake about 20 mins. longer. Yield—6 servings.
